

## Learn More About Kauai Candy **SATIVA**

Introducing Kauai Candy, a vibrant sativa strain from 808 Genetics that captures the essence of heritage and modern breeding in one delightful package. Available in 1g and 3.5g flower, as well as 1g, 5-pack, and 2-pack pre-rolls, Kauai Candy offers a rich, multifaceted experience for every cannabis enthusiast.

Kauai Candy is a carefully crafted cross between two iconic strains: Kauai Electric and Candy Machine (Runtz BX2). Kauai Electric, a 100% Hawaiian landrace sativa, was originally cultivated on the North Shore of Kauai under power lines, giving it a sharp, electric effect known for uplifting and energizing the mind. Paired with Candy Machine, which blends the sweet, fruity notes of Runtz with Strawberries and Cream F2, Kauai Candy delivers a unique profile of sweet skunk and blueberry with striking purple hues. The aroma is bold and inviting, while the flavor offers a smooth blend of fruity sweetness and subtle floral notes, enhanced by earthy undertones.

Kauai Candy is ideal for daytime use, delivering a clear-headed, focused high that's perfect for creative projects, social engagements, or outdoor adventures. The effects are enhanced by a terpene profile rich in Limonene, Beta-Caryophyllene, Linalool, and Myrcene. Limonene adds a citrusy, uplifting quality that boosts mood and reduces stress. Beta-Caryophyllene brings a peppery, spicy note and may provide anti-inflammatory benefits. Linalool contributes calming, lavender-like effects that can help with anxiety and promote relaxation. Myrcene adds earthy, musky undertones and enhances the overall sedative effect, balancing the energetic high with a touch of relaxation.
